

HC-1

HC-1 Hull Mounted Running Gear Camera

The HC-1 is designed to be mounted to the hull of your vessel. This HC-1 may be used to monitor stabilizers, screws and rudders. Commercial and recreational vessels alike benefit from a live view of these high cost items. The video may be viewed on any monitor that accepts composite video input.

FEATURES

- High Resolution Image
- Low Light Operation
- Hydrodynamic & Rugged Housing
- Easy Installation

SPECIFICATIONS
