

SideWinder Black 360

Dual Camera Panning Underwater Point of View Camera

The SideWinder 360 is your eyes to the underwater world. Its high-resolution camera and extremely low-light operating capability allow you to see in almost any environment. You can choose between the fixed down looking camera or the 300 degree panning sideview camera. Making the SideWinder the perfect tool for underwater construction, marine studies, dive site monitoring and much more.

- **Excellent Picture Quality**

The SideWinder 360 incorporates a 1/3-type Sony Super HAD II sensor providing outstanding picture quality and superb light sensitivity.

- **Two Cameras**

The SideWinder 360 is equipped with a fixed downlooking camera as well as a side view camera that rotates in the housing 300° which allows you to see a full 360° degrees

- **Handheld Controller**

The handheld controller allows you to control all functions of the camera as well as turning on the depth/temp and direction display.

- **Separate Lighting Chamber**

Improoves viewing distance of horizontal camera

- **No Installation Required - Fully Portable**

Use the SideWinder 360 anywhere.
